EXPERIENCE

Product Design and Research Intern May 2026 - Present

Lehigh University College of Education • Remote

- Designed low- and high-fidelity Figma prototypes and helped build production-ready web interfaces for digital products, including an e-learning platform and a brand marketing website
- Integrated AI tools into the product development process, leveraging GPTs to accelerate prototyping, generate code, build MVPs, and iterate on product concepts and user experiences

UX Designer Jan 2026 - May 2026

Lehigh University Computer Science Department • Bethlehem, PA

- Served as a UI design consultant for multiple capstone teams, collaborating with developers to audit existing systems, define user problems, conduct A/B testing and design interfaces for a range of web and mobile projects
- Developed marketing material such as email templates, slide presentations, and social media posts

Museum Educator Intern Jan 2025 - May 2026

Lehigh University Arts Gallery (LUAG) • Bethlehem, PA

- Designed custom illustrations and visual assets to communicate complex themes clearly and increase visitor engagement across physical and digital touchpoints, including social media reels, posts, and online promos
- Planned and delivered interactive, user-centered tours and experiences for groups of 30+ participants, translating abstract concepts into accessible, compelling narratives

Group Operations and Terminal Development Intern June - Aug 2024

Hutchison Ports Holding • Tsing Yi, Hong Kong SAR

- Designed and ran simulation experiments to understand system behavior and constraints, translating findings into insights for enhancing energy efficiency in autonomous trucks
- Presented findings and actionable recommendations to supervisors to inform operational decisions

PROJECTS

Lingua: Language Learning App Jan - April 2026

Lehigh University • Bethlehem, PA

- Designed a language-learning app for children of immigrants, bridging Duolingo and Quizlet with context-based modules (flashcards, quizzes, games) and a user-generated system for underrepresented languages
- Led end-to-end UX process, created wireframes and prototypes, and conducted low- and high-fidelity user testing informed by surveys and interviews to validate real-world communication needs

EDUCATION

Lehigh University • Bethlehem, PA

B.S. Integrated Degree in Engineering, Arts, and Sciences

Concentrations in Computer Science and Graphic Design

B.A. Global Studies

May 2026

GPA 3.89/4.0

SKILLS

Design Tools: Figma, Illustrator, Photoshop, InDesign, Final Cut Pro

Front End Development: HTML/CSS, JavaScript, ReactJs

Techniques: User Research, UX Prototyping, Design Systems, Brand Development, Video/Photo Editing

AI Tools: Claude, Cursor, Google Stitch, ChatGPT, Lovable, Framer, Figma Make
